

2.NBT.2 Parent Helper

I CAN SKIP COUNT BY 5'S, 10'S AND 100'S TO 1,000.

Your child is learning to skip count by 5's, 10's and 100's all the way up to 1,000.

Sample Problems:

What are the next five numbers if you ____?

- Skip count by 5's starting at 245.
- Skip count by 10's starting at 587.
- Skip count by 100's starting at 142.

Vocabulary Terms:

Skip Count
Hundreds,
Tens, Ones

Fill in the missing numbers:

____, 380, 380, ____

210, 215, ____

490, 495, _____, _____

Need more resources?

A great resource for helping students master skip counting by 5's is Schoolhouse Rock. You can find this on YouTube. There are plenty of other videos that can help your child with skip counting as well. Just search "skip counting by (10's, 100's) to find them!

Helping my child:

Is your child struggling with skip counting? Practice skip counting by 5's (10's or 100's) first, see how high your child can go. Write down the numbers they say and discuss the patterns they notice. Then give them fill in the blank skip counting problems.

Example: 675, _____, 685

This is a very important skill for your child to master as it will help them add and subtract mentally.

Challenging my child:

Is this standard easy for your child? Challenge them to use larger numbers when skip counting. How high can they go? What happens when you finish the thousands? Does your child know how to go to 10,000?

Challenge your child to skip count backwards and forwards. When they are exercising you can have them do push ups (hop, jump rope..etc) skip counting instead of counting regularly.
